Nominations Called For Divisional School Trustee

The annual meeting of the electors of the Carbon subdivision of Drumheller School Division No. 30 is scheduled to be held in the Carbon Scout Hall at 2 p.m. on Thursday, November 29th. At this meeting nominations for the office of divisional trustee will be received up until 4 p.m. Retiring trustee is James Gordon.

Attendance at previous annual meetings in Carbon has been negligible and, in a matter concerning future educational standards for children of Carbon district residents, a keener interest should be shown. It is hoped that this year will show a record attendance at the meeting.

Carbon

Rev. Fred E. Klein of Colfax, Wash., will conduct special evangelistic services at Zion Baptist Church from November 19 to 30, at 7:30 p.m. nightly except Saturday. All are welcome to attend.

Don't forget the Carbon Home and School Association Harvest Supper on Saturday, November 17, at 5:30 p.m.

Mr. and Mrs. G.M. Rinas of Chilliwack, B. C., have been visiting at the home of their son-in-law and daughter, Mr. and Mrs. Renold Neher.

Mr. & Mrs. Bob Shaw motored to Edmonton for the holiday weekend where Mrs. Shaw and children remained to visit relatives.

The Senior Group of Carbon United Church will hold a Bazaar, Tea and Sale of Home Cooking in the Carbon Scout Hall on Saturday, November 24, from 3 to 6 p.m.

Mr. and Mrs. Morris Switzer and Patti spent the long week end with relatives in Calgary.

Miss Dorothy Mortimer of Calgary was a weekend guest at the home of Dr. and Mrs. G. L. McFarlane.

For an enjoyable evening of fun come to the Whist Drive in the Carbon school on Friday, November 16, at 8 p.m. Lunch will be served. The event is sponsored by Grades VII and VIII and proceeds are for the junior Red Cross.

Do You Think You're Fireproof?

YOU DON'T STOP PAYING for fire insurance on your home just because you may have lived there successfully for 20 years without suffering a fire, points out Health magazine in an editorial. By the same token, wise parents don't neglect the immunization of their family just because they've never had a close relative or a friend's child struck down by one of the preventable diseases—diphtheria, whooping cough, tetanus (lockjaw) or smallpox.

Continued Vigilance Is Imperative

"Wise parents and their physicians may never have had a close friend or relative struck down by one of these insidious killers; but they realize that continued vigilance is imperative," declares the Health League of Canada magazine. The effectiveness of a persistent immunization program has been demonstrated by several Canadian cities. Take Brantford, Ontario, for example. For the past 20 years the Telephone City boasts a completely clean sheet so far as diphtheria is concerned—not a single case reported since November, 1930. The last death from diphtheria in Brantford occurred in 1929. This is claimed to be a world record among cities of comparable size.

Immunization Gospel A Must

Or take Toronto, with only one case and no diphtheria deaths in the three years 1948-50; and Hamilton, Ontario, with its notable achievement in prevention. But elsewhere in Canada, despite the availability of safe and simple immunization, there were 305 deaths from 12,182 cases of whooping cough, and 49 deaths from 421 cases of diphtheria last year. "It is clear," concludes the Health League magazine, "that the gospel of immunization must still be preached."

Suggests King Visit Canada To Recuparate

VANCOUVER, B.C.—The Vancouver Sun suggests that King George should spend a month or two in Canada when he recovers.

"The king is King of Canada," the newspaper said in an editorial. "The reigning monarch is unfortunately not a well man, but in the future the king of Canada should play a larger personal part in the government of Canada."

The editorial suggested the king should open Parliament annually.

INGERSOLL
cheese
FOR ECONOMY
MEALS THAT ARE
HEARTY-NUTRITIOUS

INGERSOLL
FLOATING DUMPLINGS

1 1/2 cups water; 1/4 tsp. salt; 1/4 tsp. pepper; 1 tsp. sugar; 1 can condensed tomato soup; 1/2 cup (4 oz.) shredded INGERSOLL BABY ROLL — a delicious cheddar blend with a touch of a tang. Or, if you prefer milder cheese, use INGERSOLL RIDEAU. 1/2 lbs. grated onion; 1 cup prepared biscuit mix; 1/2 cup milk.

Add water, seasoning and sugar to tomato soup and heat. Add shredded cheese, onion and dash of salt to prepared biscuit mix, blend lightly. Add milk to make a soft dough. Drop by spoonfuls into boiling soup. Cover tightly and cook slowly for 20 minutes. Do not lift cover during cooking. (A green salad is a good accompaniment to this dish.) Makes 4 servings (8 dumplings).

Dream of a main dish for a chilly day — hot, tasty, nutritious. Best of all, INGERSOLL CHEESE dishes are so economical, stretch your food dollars, yet provide the flavorful fare your family wants. You'll find Ingersoll Cheese extra delicious: it's blended from fine Ontario cheddar, made to recipes perfected in over 60 years of cheese making.

Always ask for
INGERSOLL
a cheese for every taste

Funny and Otherwise

Employer—Do you think you know enough to be useful to this office?

Office Boy—Know enough? Why, I left my last place because the boss said I knew too much.

Teacher: "What tense is 'I am beautiful'?"
Pupils: "Past."

Harper, seeing his friend Cash standing in the rain outside an expensive seaside hotel, went up to him and said, "What are you going to do, old chap? Stay out and get wet or go in and get soaked?"

She—They seem such a happily married couple.

He (absently)—You can't go by looks, my dear. They may be saying the same thing about us.

Two little girls were playing keeping house, one being the wife, the other the husband. When the "wife" insisted on carrying the purse the other objected.

"Don't you know," persisted the "wife" it is the man who earns the money but the woman who spends it?"

"And what are you doing about saving electricity?"
"We've stopped the electric clock and my husband is using an ordinary razor."

Benevolent Old Gentleman (rescuing one small boy from the pummeling of two others): "What are you hurting this boy for?"

"Because he made so many mistakes in his arithmetic this morning."

"But what business was that of yours?"

"Why, he let us copy our answers from his."

"I don't understand how you came to marry her," a man remarked to a friend whose marriage had failed. "You admit that you didn't particularly care for her—then how did she get you?"

"Well," came the dry rejoinder. "It's not something you can explain very easily, but I suppose it must have been because she wanted me worse than I didn't want her!"

During an informal talk on physiology, the lecturer said: "It has recently been found that the human body contains sulphur."

"Sulphur?" exclaimed a girl. "And how much sulphur is there in a girl's body?"

"The amount varies," said the speaker.

"Oh," returned the girl, "and is that why some of us make better matches than others?"

Editor: "Have you submitted these poems anywhere else first?"

Poet: "No, sir."

Editor: "Then where did you get that black eye?"

Everyone in the village had vainly searched for a lost cow. Finally the local nitwit went out and brought her in.

"How did you find her so quickly?" the owner asked in surprise.

"Why," the nitwit explained, "I just thought if I were a cow where I'd go, and I went there and there she were."

The clerk at the bookshop told a student, "Here's a book that will do half your work for you."

"Great," said the student. "Give me two of them."

MEASURE ACCURATELY

Concentrates of Vitamins A and D should be measured accurately—drop by drop. Overdosage is dangerous and may produce calcifications in the tissues of children.

Beet Growers Returns Greater

WINNIPEG. — The first bag of sugar produced from beets in Manitoba sold at auction for \$2,000.

That was 11 years ago. This year more than 1,000 growers in the province will receive \$2,625,000 for their crops.

The province's only processing plant—a \$1,000,000 structure at Fort Garry—expects to extract sugar from a record 175,000 tons of beets before it shuts down for the year early next January.

Since harvesting began, bulky mechanical pickers and strong-backed laborers have plucked the sweet crop from almost 20,000 acres planted last spring. Sugar output should reach 44,000,000 pounds compared with last year's record of 35,000,000 pounds.

Manitoba's first sugar beet crop dates back at least 50 years when the provincial government harvested small experimental plots. It took drastic sugar shortages during two world wars to persuade government officials and farmers that the industry had a future.

The Canadian sugar beet industry is scattered in four provinces — Alberta, Manitoba, Ontario and Quebec. Alberta yields are considerably above the other provinces, partly because beets are grown on irrigated land.

Alberta's crop this year is expected to be 420,000 tons from 36,000 acres planted. Ontario has the next largest crop with 347,000 tons expected from 31,550 acres.

Manitoba is third followed by Quebec which reports 10,000 acres sown and an exported crop of 100,000 tons.

HAD GOOD SEASON

REGINA. — Saskatchewan's well-known fishing spot at Lac La Ronge had a record number of fishermen this year. Estimates are that about 6,000 visitors, mostly Americans, took more than 270,000 pounds of fish from the lake, mainly lake trout, pike and pickerel.

Ginny Simms Compares Blue Bonnet — Sings Its Praises!

Give your meals a new note! Take this tip from Ginny Simms. Compare BLUE BONNET Margarine with any spread at any price. Like the celebrated songstress, you'll love the morning-fresh, sunny-sweet flavor of this fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy. So buy BLUE BONNET and get "all 3" — Flavor! Nutrition! Economy-e-e! Use it in cooking, on vegetables, as a delicious spread.

BLUE BONNET Margarine is sold in two types — regular economy package with color wafer, and also in the famous YELLOW QUICK bag for fast, easy color.

Be Happier
WITH A HOBBY...

Whether you fancy shell craft, leather work, bead work, pottery, weaving, metal work or any one of hundreds of hobbies, you can start right now to make useful, beautiful articles with one of these Lewiscraft Kits. Simple, complete instructions, all the materials you need to give you a thorough understanding of the hobby you choose. Write today for our catalogue and complete information on Hobby Kits available.

Or order now by mail. Send money order. You will receive your Hobby Kit by return mail.

Complete Hobby Kits—Nothing else to Buy!

Gardenia Shellcraft Kit

Lovely white or rose shells to make a gardenia for your lapel. Complete materials and instructions. Kit comes in beautiful plastic pink or blue box; can be used later for your jewellery. State colour choice of shells and box. Postpaid \$1.25

Pre-Sketched Oil Painting Kit

Now you can paint oil pictures like professional artists do. No lessons required. Lewiscraft kit contains ready sketched canvas and key to colours with full instructions on how to paint. Oil paints, brushes included too—everything to start painting on arrival of kit. State choice of Snow or Countryside landscape or Flowers or Ship. Postpaid \$3.00

Beginners Leather Tool Kit

Beginners Leather Tool Kit No. 3: contains just the tools to start on this most popular craft—mallet, knife, modeller, steel square, awl, slip punch, soft working board. Attractively packaged for gift. Postpaid \$4.00

Rubber Mould Junior Kit No. 12

This kit will introduce your young friends to the fascinating hobby of making art model figures. Simply pour a solution of moulding powder into rubber moulds. Make a penguin, a skunk, a dog — all necessary moulding materials, paint and brushes — complete instructions are included. Postpaid \$2.00

Sportsman Moccasin Kit

Moccasins — make them at home. Just the thing for slippers or outside sports. Wonderful kit. Extra thick leather, natural finish heavy bull hide, ready to be laced. Give size and state for man or woman. Postpaid \$3.00

Glamour Jewellery Kit No. 2

Make up your own costume-matching and eye-catching lapel ornaments and Christmas decorations with this versatile, decorative, metallic plastic material. Instruction book describes several projects, two pieces of material and one dozen brooch pins included. Postpaid \$1.50

Western Towns Gain Awards For National Efforts

Vegreville, Red Deer, Dauphin and Winnipeg Recognized by Canadian Chamber of Commerce

QUEBEC. — Awards for work in fire prevention and in health and safety programs were made by the Canadian Chamber of Commerce to local boards of trade and chambers across Canada.

The fire prevention contest is based on reduction in fire losses, permanent improvement in building construction, general fire protection, and particularly the participation of the local board or chamber in preventive and educational work. Winners of the fire shield were:

Communities of more than 50,000 population, Ottawa board of trade; 15,000 to 50,000, La Chambre de Commerce, Hull, Que.; 5,000 to 15,000, Kenora, Ont., board; honorable mention, Red Deer, Alta., and Nelson, B.C., boards; less than 5,000, Vegreville, Alta., chamber; honorable mention, Lunenburg, N.S., board.

The health and safety contest is based on accomplishments in health and sanitary improvements, reduction in accidents and communicable diseases, and particularly the educational and preventive work carried on by the local board or chamber. Winners of the awards, metal statuettes, were:

Communities more than 50,000, Windsor, Ont., chamber of commerce; honorable mention, Winnipeg chamber; 15,000 to 50,000, greater Niagara chamber; 5,000 to 15,000, Red Deer, Alta., chamber; honorable mention, Dauphin, Man., chamber; Kenora, Ont., board; Thorold, Ont., board; less than 5,000, Lunenburg, N.S., board.

CAT, 17 YEARS OLD

WINNIPEG. — Speaking of cats with nine lives, Peggy must have passed her ninth life years ago. Owned by T. Boivin, 561 Balmoral avenue, Peggy now is 17 years old and weighs a spanking 26 pounds. Humane society officials in Winnipeg said they've known cats to live over 20, but that Peggy's case "still is remarkable". Her 17 years compares with 119 for an ordinary human.

Itch... Itch... Itch

I Was Nearly Crazy

Until I discovered Dr. D. D. D. D. Prescription. World popular, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, pimples, rashes, stings, bites and other itchy troubles. Trial bottle, 43c. (Genuine). First use soothes, checks raw red itchy or money back. Ask druggist for Dr. D. D. D. Prescription (ordinary or extra strength).

PEGGY

Canadian Research

New Machine Controls Heart Without Piercing Chest Wall

OTTAWA.—A heart machine with a tiny, electric pulse, designed to prevent failure of the human heart during surgery, is the newest thing in Canadian electro-medical research. It is a box-like machine of dials and switches about the size of a mantel radio. Attached is a flexible plastic tube with a wire carrying two electrodes which can be inserted in the jugular vein to touch a vital region of the heart.

By means of electrical pulsations through the electrodes, it can reactivate a heart which has stopped beating and can control the rate of heart-beat during operations—an important consideration for the surgeon.

It can do this without the necessity of opening the chest wall to get at the heart.

Scientists at the National Research Council's electrical laboratories where it was built, stressed that it still is in the experiment stage. But this brainchild of two Toronto medical scientists may some day have wide use in hospital operating rooms.

In addition, defence authorities are interested in it.

It was developed by Dr. T. C. Callaghan and Dr. W. F. Bigelow at the university of Toronto's department of

surgery with the aid of a grant from Canada's Defence Research Board.

Scientists in the N.R.C.'s electrical branch here, headed by Charles Paterson, 37-year-old University of Alberta graduate, and John Hopps, 32-year-old graduate of the University of Manitoba, built the machine after the Toronto doctors told them what was wanted.

Machines for electrical stimulation of the heart are not new. But they usually necessitate cutting the chest wall to get the electrodes on the "pace-maker" region of the heart, the vital nerve centre which controls the action of the heart muscles.

Dr. Bigelow and Dr. Callaghan came up in 1949 with their idea for addition of a tube—called a catheter—carrying the electrodes for insertion into the jugular vein to reach the heart without the necessity of opening the chest wall.

The model built here has many refinements. It draws current from an ordinary light socket, cutting down the juice to the required, tiny strength. It contains apparatus for producing the desired pulsation. By turning a dial calibrated in heart-beats-per-minute the surgeon can quicken or slow a patient's heart to the desired pace.

The "pace-maker" research machine can "take over" the action of the heart at higher or lower rates than normal, the electrical stimuli inhibiting the normal beats.

An N.R.C. spokesman said that the machine now is being built by a commercial surgical supply firm in Toronto and has been used in the Toronto General Hospital.

30-Inch Mosquito Cost \$2,000

BOSTON.—The Boston Museum of Science bought a 30-inch "mosquito" for \$2,000.

The king-size model, made of purified beeswax and plastic, is a replica of the common 'skeeter found in the United States.

Chris Olsen of West Nyack, N.Y., took eight months to build the model, putting on the more than 20,000 scales individually. He fashioned the thousands of hairs from nylon and colored them by hand.

To insure faithful reproduction, Olsen used up more than 24 real mosquitoes, studying every detail under a high-powered microscope.

The model is magnified 262,000 times life size, which means that a hollow mold the same size would hold that number of real mosquitoes.

U.S. Hunters Will Remember Stay In Northwest Ontario

FORT FRANCES, Ont. — A 14-year-old boy and his sling-shot, and parking-meter hitching post will likely be long remembered by a party of United States hunters who have returned to their Illinois homes from this northwest Ontario district.

The boy and his sling-shot drew their attention when they returned from a hunting sojourn in the Kenora area.

At Sioux Narrows the tourists stopped the young boy and asked where he had shot the four partridges he was carrying. They discovered there was no shot in the birds.

The boy demonstrated: He drew a sling-shot from his pocket, aimed and precisely dotted an "I" on a nearby signboard.

The Americans' next surprise came when they attempted to park on a busy downtown Fort Frances street.

Spying a vacant parking meter zone they began to head in. Before they could wiggle their car into position a horseman rode up, jumped from the saddle and tied his mount's rein to the parking meter.

That's north country, suh — it's mighty rugged yet.

HERE'S HEALTH

SUCH A BRILLIANT SMILE HAS KEITH BECAUSE HE TAKES CARE OF HIS TEETH. BRUSHES THEM EACH TIME HE EATS AND ALWAYS AFTER EATING SWEETS.

Dept. of National Health and Welfare

GEMS OF THOUGHT

HABITS

The habitual struggle to be always good is unceasing prayer. — Mary Baker Eddy.

It's a good safe rule to sojourn in every place as if you meant to spend your life there, never omitting an opportunity of doing a kindness, speaking a true word, or making a friend. — John Ruskin.

The cure of crime is not the electric chair, but the high chair. — J. Edgar Hoover.

Habits are at first cobwebs, then cables. — Spanish Proverb.

Habit is a cable; we weave a thread of it every day, and at last we cannot break it. — Horace Mann.

Train up a child in the way he should go; and then he will not depart from it. — Proverbs.

TO PENETRATE ARCTIC ON NAVIGATION SURVEY—First Canadian woman to fly into the snow-bound Arctic on a full-scale navigation survey is Miss Dunbar, pretty 33-year-old defense research board employee, seen above. With a party of 15 other research board scientists and R.C.A.F. navigation experts, Miss Dunbar, will fly over 1,000,000 square miles of frozen northland on a 10-day excursion to test new navigation instruments. Born in Edinburgh, Miss Dunbar visited Canada in 1947 and decided to remain. — Central Press Canadian.

STANDARD BRIDGE

By M. Harrison-Gray

Dealer: North

Game all

N. 10 9 8 7 6 5 4 3 2 A
S. 10 9 8 7 6 5 4 3 2 A
W. 10 9 8 7 6 5 4 3 2 A
E. 10 9 8 7 6 5 4 3 2 A

In this deal every key feature can be identified by cue bids after the trump suit has been agreed by a jump raise.

The full sequence is One Diamond — One Spade; Three Spades — Four Clubs; Four Diamonds — Four Hearts; Five Clubs — Five Diamonds; Five Hearts — Six Spades; Seven Spades. North's Four Diamonds is a cue bid to show his Ace, and South's Five Diamonds shows second-round control — neither bid can denote a wish to play in Diamonds once Spades are agreed. Each cue bid not only gives information but invites an answering cue bid at an economical level. South cannot bid more than Six Spades as the trumps may not be solid, but North calls Seven on the strength of his top Spades.

PRACTICE CLEANLINESS

Undesirable conditions in public washrooms are not always the fault of the proprietor of the hotel, store, restaurant or gas station concerned — most blame can be attached to those using the facilities. They should see that the rooms are left in as sanitary, or even better, condition than when they entered.

Fish reportedly produce more abnormalities than do any other living beings.

On The Side : E. V. Durling

During the war years when material was scarce the vest was eliminated in most made-to-measure suits. It still is not furnished by many tailors. I don't care. I never wear a vest anyhow. But I could use an extra pair of trousers. Why don't tailors who have eliminated the vest offer their patrons an extra pair of trousers at little additional cost.

With Tongue In Cheek

Know a traffic cop? Or highway patrolman? Ask him what was the most curious arrest he ever made. See if he can top what happened to a Florida patrolman I know. He chased an automobile which was zig-zagging along the highway at terrific speed. When he caught up with the car he nearly fell off his motorcycle with amazement. A Great Dane dog was driving the automobile. By the dog sat the owner of the car, who said: "I'm giving my dog driving lessons in case of emergency." Certainly it happened. Check the records and see if I care.

Wigs For Women

Unfortunately women can become bald as well as men. Blondes become bald much sooner than brunettes. It is indeed a sad situation when a woman loses her curly locks, but still she can acquire a wig that will be so remarkable very few people will recognize it as such. Wigs are now available that even fool other women. A wig, or should I say transformation, that can do that is really something. When a woman wears false hair it inspires no adverse comment. But when a poor guy, who has lost his hair early in life, resorts to a toupee he is constantly subjected to wise cracks. The unjust part of this situation is that most such wise cracks about men's toupees are made by women.

Better Cook Books

There are thousands of different kinds of cook books, but one angle of the culinary art has yet to be dealt with. Somebody should write a book titled "How To Cook Where No Cooking Is Allowed". The book to be for the benefit of people who cook in hotel rooms. It should include recipes for odorless cooking. Seems nearly everybody who cooks in hotel rooms prepares something with onions or cabbage in it. This happens in the best hotels.

The windows I favor when window shopping are those which have price tags on what is displayed. Makes it more interesting. Believe it also stimulates trade. . . . In Australia voting in elections is compulsory. Those who failed to vote are penalized with a stiff fine. Great idea.

The Exception, Maybe

Dr. Marianne Bernstein, European physician, recently advanced the claim that bald-headed men become the fathers of many more sons than daughters. The experience of a bald-headed resident of Pittsfield, Mass., named Lloyd Brooks gives the doctor's claim a terrific setback. Mr. Brooks is the father of 12 daughters!

HEALTH

Whooping Cough Is Worst Killer

Whooping cough causes more deaths each year in Canada than diphtheria, measles, scarlet fever, or poliomyelitis, and among children under two years of age deaths from whooping cough exceed those from these four other diseases combined! This startling statement is made by the Health League of Canada to point up the dramatic need for immunization against whooping cough.

"Of the various infectious diseases encountered today, whooping cough presents the chief problem from the standpoint of reduction in mortality," a medical spokesman for the Health League summed up. "It is in the younger age group that the high mortality in whooping cough occurs. Eighty-five to 90 per cent. of deaths from this disease occur before the third year of life, and more than half of the total whooping cough deaths occur in infants under one year."

The whooping cough mortality rate increases in winter when bronchopneumonia is more prevalent, and in summer when intestinal upsets are common. The disease is particularly hard on youngsters who are debilitated, delicate and poorly nourished, or who may be living in poverty or under unfavorable home conditions.

Whooping cough is present in most communities the year round, but in Canada it shows a definite increase in early winter. The disease may attack any man, woman or child, from two weeks of age into advanced years; but those mainly affected are under five years of age. It is an extremely contagious disease—75 to 90 per cent. of infants and children intimately exposed to a case will become infected if they have not had the disease or been immunized. One attack of whooping cough usually protects the person for life; but second attacks have been known.

"Because of the seriousness of whooping cough as a leading cause of death and also because of its after-effects, the elimination of this disease is one of the main objectives of National Immunization Week," observed Dr. Gordon Bates, general director of the Health League. "We are fortunate to have readily available a safe vaccine which is itself harmless and which provides protection in more than 80 per cent. of children to whom it is administered. In the minority of children who may not be rendered 100 per cent. immune by the whooping cough vaccine the disease, if contracted is much milder."

Whooping cough vaccine is now available in a preparation combining it with diphtheria and tetanus toxoids. This makes it possible to secure triple immunity with a single series of injections, saving time and trips to the doctor's office or immunization clinic.

WINNIPEG MAN MISTAKEN FOR U.S. PRESIDENT

QUEBEC. — William C. Glass of Winnipeg says he has a problem. People are always greeting him thus:

"Pardon me sir, but you're a dead ringer for President Truman."

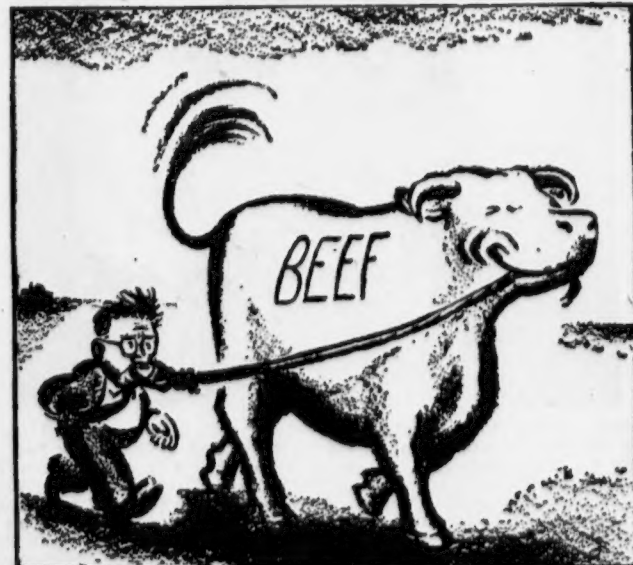

The carbon copy of the President of the United States arrived aboard the liner Empress of Scotland after a three-month visit in the United Kingdom.

In Scotland, Mr. Glass said, one newspaper ran his photograph with the headline: "President Truman arrives in Scotland."

Mr. Glass' family, too, takes after the President's.

His wife's name is Bess and they have a daughter, Margaret.

PRESENTED WITH BUCKSKIN SHIRT AND MOCASSINS—Sleet and rain did not prevent 5,000 school children from giving royal couple an ovation when they stopped off at Lakehead city of Port Arthur. Ojibway Indian Princess Jane Bannon is seen presenting Princess Elizabeth with a buckskin shirt and mocassins for Prince Charles and Princess Anne.—Central Press Canadian.

THE EMPIRE'S BIGGEST UNION JACK—This great Union Jack over the main entrance to the Sun Life Building measures 80 feet in length and 40 feet in width and faces the Windsor Hotel where Princess Elizabeth and her sailor husband, the Duke of Edinburgh stayed during their visit in the metropolis. The giant flag, largest in the British Empire, was made in Ottawa for the 1939 tour of King George and Queen Elizabeth. It floodlighted at dusk each night the Royal Couple spent in Montreal.

SHE MADE R.C.A.F. HISTORY—Flying Officer Isabelle Thomson of North Bay, Ont., appears to be engrossed in that all-absorbing feminine occupation of "priming". In reality, however, she is signalling with a mirror to her fellow "para-rescuers" that she has completed her practice jump at Henry House field, Jasper, Alta. She is one of the four Canadian nursing sisters who received coveted R.C.A.F. "para-rescue" badge at graduation ceremonies in Edmonton, thus ending a rugged 14-week training course. Although this is R.C.A.F.'s third peace time "para-rescue" course, it marks first time in Canada that women have successfully completed the arduous course.—Central Press Canadian.

—Central Press Canadian.

IN IRAN'S WAKE—Although Burma intends to nationalize her oil industry, Premier Thakin Nu said that "we will do it in an orderly manner by slow stages," through purchase rather than confiscation. The Burmese premier, (seen at right), disclosed that his government is negotiating with the British-owned Burma Oil Co. for a joint venture with a capital of £50,000,000 of which Burma would furnish £5,000,000 by purchasing stock.

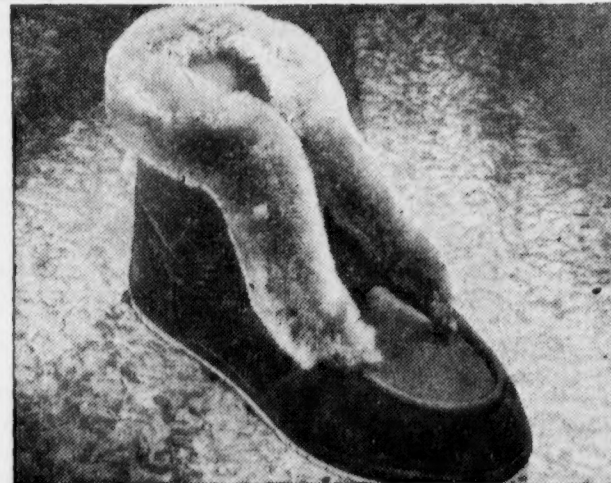

The three parts of a comet are nucleus, coma and tail.

WHERE IS MUMMY?—This little fellow's first name is Stanley, but Los Angeles police don't know his last name or where to find his parents. The three-year-old was left with Mrs. Carrie Mary Nation, 64, at her suburban home by an unidentified woman. A few days later, Mrs. Nation died. The mother has never returned. Now Stanley lives at Juvenile Hall, passing the lonely hours with a nameless pup who arrived under similar circumstances.

NIGHT AND DAY ON "HEARTBREAK RIDGE"—South Korean machine gunners are shown, top, blasting away at a stubborn Communist position in a night attack on "Heartbreak" ridge. Above, the follow-up attack at dawn that brought Red survivors crawling from their holes to surrender. The ridge is now in U.N. hands, but acceptance of the Communist truce line would necessitate allied withdrawal from the hard-won position.—Central Press Canadian.

WINTER COMFORT—New Banff boot in featherweight, water, wind and rain resistant nylon, shown at the Canadian Shoe Information Bureau's Fall and Winter style show. This is in blue, but with the zippered up-the-front stadium boots also modelled, comes in a wide range of ensemble colors—green, navy, brown, red, grey. Made on a rubber sole corrugated to prevent slipping.

Skate To Be Great

Great hockey players are almost always great skaters. And contrary to a widespread belief, great skaters are not born—they are made. They make themselves.

Analyze the current N.H.L. all-stars. At center is Milt Schmidt, a fine stick-handler who can out-skate and out-shift just about anyone on ice. He has developed several effective skating tricks and shifts. At left wing, Ted Lindsay, the fiery, driving type of player who skates with powerful, driving strides. At right wing, Gord Howe, great because he has learned the value of relaxation. He can accelerate, shift or change direction without apparent effort.

Red Kelly on defence spent hours during his teenage career learning to skate backwards, and to shift from backward to forward skating without losing a stride. Bill Quackenbush, not an exceptional skater, can nevertheless do everything well, something few players have learned to do. He can go both ways, to either side, and when need be can turn on speed too.

Maurice "Rocket" Richard is another great skater. His tremendous shooting skill gets most of the publicity, but Richard spent hours early in his career just learning to skate, and more particularly, to accelerate. Now, when he sees an opening he can leave his check behind faster than any other man in hockey.

There is no part of hockey in which even a small improvement can mean so much. Some people are born with muscles and co-ordination that are particularly adapted to skating, and catch on quicker. But anyone can improve his technique tremendously by paying special attention to correct fundamentals and working on weak spots during practice.

To practice properly, however, you have to know what these correct fundamentals are. We'll talk about the most important ones in this and the next few columns.

Fashions

Mother! Look!

Mustard gas caused 400,000 casualties in World War I.

World Happenings Briefly Told

The British aircraft carrier Warrior left for Singapore recently with replacement aircraft and naval personnel for the Far Eastern fleet.

The Italian immigrant ship Castalbano has arrived at Quebec with 1,016 immigrants from various European countries. Most of them will settle in Ontario and in the western provinces.

Orders worth \$45,000 have been placed by the United States and Canada for toys and Christmas tree decorations from Saxony, in the Soviet zone of Germany, the official East German news agency said.

Bees which have hived for years in the roof of an old church near Market Harborough, England, successfully resisted an invasion by wasps. During the three-week battle no services were held in the church.

Two white farmers and an African laborer were committed for trial on charges of stealing six children. It was alleged they took the youngsters without the knowledge of the parents and set them to work on farms 1,000 miles away.

The Standard Telephone and Cable company, one of Oslo's largest industrial plants, has opened its own dental office, first of its kind in Norway. Staffed by two dentists, the office will operate as an adjunct to the company's medical centre.

The United Nations still has to collect more than \$14,000,000 before the year is out to balance its books. China paid in \$500,000—part of her 1949 and 1950 dues, Britain owes about \$141,000, Russia owes nearly \$3,000,000, the United States \$2,378,244 and France \$1,000,000.

TRY AND STOP ME!

By BENNETT CERF

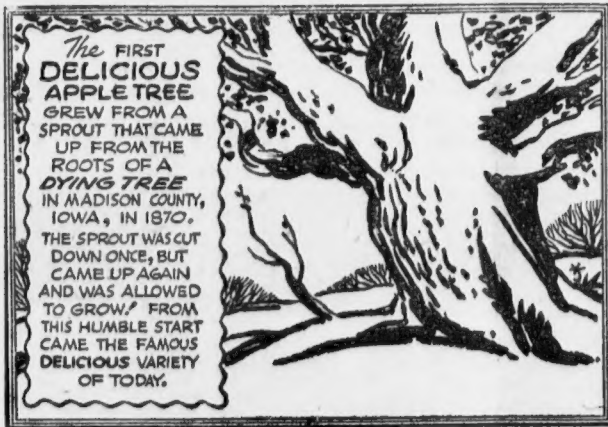

McPherson's son confessed sadly to his dad that in a moment of madness he not only had loaned five pounds to a friend, but had neglected to secure a signed promissory note. "Now I kinda collect," he mourned. McPherson, senior, was equal to the emergency. "Write and tell him you need the 10 pounds at once," he ordered. "When he replies that he only owes you five, you'll have it in writing."

PERFUME FROM APPLES

In an attempt to reduce the surplus in the country's apple crop, the U.S. Department of Agriculture is experimenting with a method to develop commercial perfume from apple essence, states C-I-L Agricultural News. Only the apple skins are being used in the process. Scientists are trying to find other uses for the waste pulp.

THIS CURIOUS WORLD

PRISCILLA'S POP—And Two Flights Up

Hunter Uses New Method For Duck Hunting

Hitches Decoy To Fish in Pond

ROCK ISLAND, Ill. — A decoy hitched to a live carp is a new duck hunting wrinkle uncovered in this area.

Harold Knight, Rock Island county conservation officer, said he was informed of the new stunt by a federal officer. The officer said a duck hunter approached him in Illinois river duck hunting region and asked if the stunt is legal. The officer said it is legal as far as he knows.

Hunting from a pond, the ingenious hunter puts through the carp's gills a harness that is attached to the decoy. The carp is small enough that it doesn't pull the decoy under water. The device is limited to use in small areas. If it was used on an open body of water, the carp probably would pull the decoy out of range and out of sight.

Hunters have been trying to fashion lifelike decoys since live decoys were outlawed several years ago.

Kitchen Meditations

By JANE DALE

THANKS AT CLOSE OF DAY

Father, we thank Thee for this passing day.

We thank Thee for kindness of those along our way.

We thank Thee for the duties, the daily bread and light;

We thank Thee for assurance of perfect rest at night.

Father, we thank Thee for this quiet evening hour;

For the peace and safety of Thy unfailing power.

We thank Thee for the refuge of one sweet hour of prayer;

We thank Thee for the knowledge of Thy love everywhere.

Weekly Tip

STEEL AND NICKEL POLISH

Make a good steel and nickel polish by mixing 1 tablespoonful of turpentine, 1 tablespoonful sweet oil, and enough emery powder to give the consistency of cream. Apply with a soft rag, then wipe off, and polish with a dry flannel cloth.

ODDITIES In The News

A neatly-dressed bandit at Rochester, N.Y., held up Louis M. Craig at gunpoint in his liquor store, and departed with \$75 in cash. Later Craig received a letter containing the \$75. It said: "This is your money taken from you the other night. Very sorry."

Edgar B. Sims, of Charleston, W. Va., who hasn't come hunting in 26 years, bagged a grouse without getting up from his desk. The bird flew against his office window and fell dead amid broken glass on the floor. Sims took the bird home for dinner.

Reginald Williams, 19, of Vancouver, was awarded \$500 for biting his tongue. The youth bit his tongue when the car in which he was riding crashed into a parked truck. The British Columbia supreme court found that G. Karn Dharney and David Fleming were negligent in parking the truck without lights. The accident occurred Nov. 28, 1950.

County clerk at Wichita Falls, Tex., Dora Davis opened a letter from Arkansas. The writer a woman, wanted to buy some civil rights. She enclosed \$1 to cover costs.

Mrs. Ida Hampel, a Polish immigrant to Melbourne, Australia, won \$25,000 in a lottery with a ticket, the number of which was the same as a number tattooed on her sister's arm while she was an inmate of a Nazi concentration camp. The sisters will share the prize.

University students of Glasgow, Scotland, decided to hold a beer-drinking contest to raise funds for a students' farewell dinner, but when officials heard of it the menu was changed to ginger beer. A brewery had intended presenting 600 bottles of beer.

GETS 30 GLASSES OF ORANGE JUICE FOR SIXPENCE

LONDON.—The passenger who inserted sixpence in a soft drink vending machine at London airport hit the jackpot. The machine pumped out 30 glasses of orange juice before the power was cut off.

Answer To Last Week's Puzzle

—By Al Vermeer

Canada's Oil Exploration Leads Into Frozen Wastes

By ANDREW R. BOONE
(CPC Correspondent)

EDMONTON, Alta.—The western world may not need Iran's oil, since the richest oil field yet mapped on the North American continent is here under Canada's west and northern plains. It is a vast underground sea formed of tropical coral.

The flat, sedimentary basin of Alberta's plain now being explored could take in all of California, Texas, Oklahoma and Louisiana, with room to spare. The rich strikes which have awakened all of Canada are but an indication of the vast supplies awaiting discovery.

Promising even greater strikes is this ancient sea extending from the North Pole to the Gulf of Mexico.

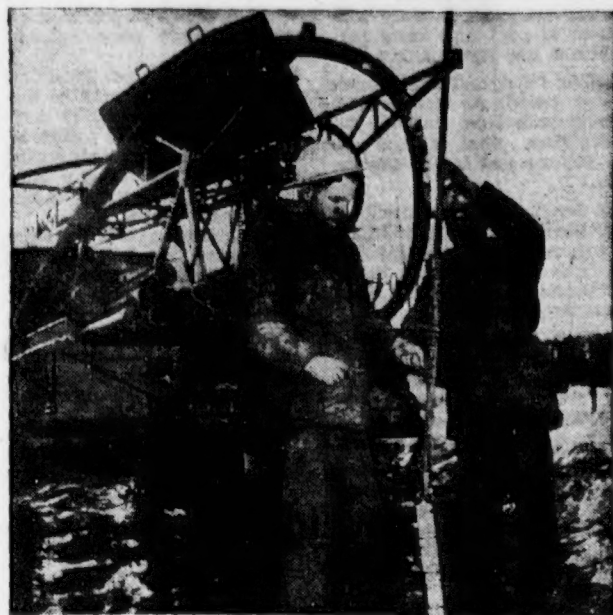

The California Standard Co., the Canadian subsidiary of the Standard Oil Company of California, discovered the clue to Canada's first production in the deep Devonian limestone at the Princess field seven years ago. Other discoveries in the Calgary-Edmonton area are now part of Canadian history.

Today, exploration looks to the north along the plains that lead to the Arctic ocean. Finding oil in Canada's wilderness involves constant warfare against nature to a degree few Canadians or Americans realize.

Some of the vast area is only sketchily indicated on maps. All is wild and forbidding. It is North America's coldest area, beset by Arctic gales and temperatures as low as 72 degrees below zero. Lake flows into lake in endless chains over thousands of square miles. Muskeg, a peat-like moss, becomes a quivering bog in summer, ready to swallow man and machine.

Only in winter can the oil exploration crews work. Through frozen earth they carefully place their drills at measured intervals along bulldozed trails.

Cold is so intense water for drilling shotholes must be carried in a boiler, its fire fed by logs, to keep it from freezing. When the thermometer drops to 30 below, lubricants solidify in a running motor, steel buckles like plywood, batteries freeze and rubber crumbles.

Technicians load shothole drilled through frozen roadway nearby. Cold is so intense water for drilling must be carried in boiler.

Despite the Arctic cold, the prize sought by these explorers is formed of tropical coral. Nearly 6,000 feet down lies the bottom of the Devonian sea. Coral reefs in long barriers rise above layers of sedimentary rocks.

Oil has seeped upward, to be trapped in the crowns of these reefs, and in porous layers above. To find and map these reefs accurately is the exacting job of the seismograph crews.

Strikes at Acheson and elsewhere indicate the reefs to be enormously rich in high-gravity oil. Canadian and U.S. companies are expanding farther and farther north.

New equipment, including special tracked vehicles, will permit their crews to labor both summer and winter to get at the black stuff awaiting the drill.

Next stop: the North Pole.

Leads In Tourist Traffic

WINNIPEG—Manitoba was one of the leaders in percentage increases of tourist traffic to Canada this year, W. B. Fraser, assistant director of the Manitoba bureau of travel and publicity said.

Mr. Fraser spoke at the annual convention here. He said as many tourists entered the province during the first six months of 1951 as in the whole of 1949.

At the end of August Manitoba stood second only to the Yukon Territory in percentage increases of vehicle entries from the United States. During the first nine months of 1951, 39 per cent. more people stayed in the province 48 hours or longer than in 1950 and 15 per cent. more than the all-time record of 1949.

Mr. Fraser said there is a growing movement of Canadians bound for vacations in the United States. This was rapidly decreasing the favorable dollar balance from American tourists.

PROTECT YOUR EYES

Take care of your eyes—give them good light to read and work with—protect them against strain and injury.

Helpful Hints

When gold lace or braid is badly tarnished, sprinkle with fuller's earth and then rub with a stiff brush.

When packing bottles for traveling, leaks may be prevented by fastening in the stoppers with adhesive tape.

If the cake mixture has been made too stiff, do not try adding more milk to it. Beat an egg and add this gradually until the mixture is of the desired consistency.

Do not apply soap directly to black materials. Wash the garment in suds made from a reliable soap, and just warm enough to cut the grease. If necessary, repeat this treatment. Then rinse several times in warm water, and finally give it a cold rinse.

SMILE OF THE WEEK

Patience is an angler's virtue—but the angler's wife needs it, too. One woman, whose husband had gone off with a fishing-rod, was feeling sore at being left alone when a friend called and asked: "Where's George?" "Go down to the river," she told him, "and look around till you find a pole with a worm on each end."

ANSWERS TO QUICK QUIZ

ANSWERS: 5. Newsprint paper. 3. About 34c of every dollar. 1. Labrador Current and the Gulf Stream. 4. Welland Canal. 2. July 1, 1951, \$50.10.

(Material supplied by the Editors of Quick Canadian Facts, the handbook of facts about Canada.)

The potato was found in North America as early as the Sixteenth Century. It is a native of South America.

Likens Prairies To Sea

Netherlands Ambassador Amazed At Size Of West Farms

REGINA.—"It's like a great sea," J. H. Loovink, Netherlands ambassador to Canada, replied when asked what he thought of western Canada. "You look about and you can see for miles and miles, just like being on a ship. It's a magnificent sight." In Regina on the last leg of a three-week tour of the west, Mr. Loovink said he has been very impressed with the prairies and the Rockies.

"I've seen all of Canada now," he explained. "I think it's an ambassador's duty to see and learn as much as possible about the country to which he is accredited."

After studying western agriculture and irrigation on his trip, Mr. Loovink said he believes possibilities for

irrigation in western Canada are "tremendous".

"Of course Alberta has several irrigation projects under way, such as the ones in the Bow river valley," he added, "but full-scale irrigation takes time and projects will have to proceed slowly."

The Netherlands ambassador expressed amazement at the size of western farms and ranches. "They are so big," he repeated. "Why, in the Netherlands there are four cows in an acre. Here a thousand acres are nothing."

Impressed with the work being done on the Trans-Canada highway, Mr. Loovink agreed it will be a "wonderful thing for the country when it is finished."

Firm in his belief that to see a country properly it is necessary to travel by car, the ambassador has made part of his western trip by auto.

"You miss so much of the country when travelling by train," he said. "In a car you have a closeup view of the scenery and can stop any time to stroll around."

Mr. Loovink found it "pretty cold" in Regina but said the western weather has been much the same everywhere he has been.

"It's too bad for the farmers," he remarked regretfully.

Dutch winters are not as cold as Canadian winters, he added, although they are much damper. But—surprisingly enough—Mr. Loovink thinks the wind is worse in the Netherlands than in western Canada.

During his diplomatic career, Mr. Loovink has served in most of the world's countries, including China, Russia and Indonesia. But, he smiled, "I like Canada as much as any country I have seen—and I don't say that just to please Canadians."

Before coming to this country in July, 1950, Mr. Loovink's only experience with Canada was when he flew over the Dominion in 1942.

Commenting on his visit to the west, the ambassador said he has learned more about Canada in the past three weeks than he could have learned by reading 10 books.

"I've visited ranches, talked to farmers and I've acquired some first-hand information about the west," he explained.

Rhode Island Safest Place From Lightning Deaths

BOSTON.—Rhode Island is the safest place in the country to live as far as lightning is concerned, according to the New England Journal of Medicine.

The state has not recorded a lightning-caused death since 1936, the journal said.

About 250 persons are killed by lightning each year, the journal said. Nine out of 10 fatalities from lightning occur in places with 2,500 inhabitants or less, and four times as many men as women are killed by bolts.

Quick Canadian Quiz

1. What two ocean currents dominate weather in the Maritimes?
2. In 1942 average weekly wages in leading industries were \$28.56. What is the present figure?
3. Exports account for what percentage of Canadians' earnings?
4. What Canadian shipping canal bypasses Niagara Falls?
5. What product is Canada's leading export?

By Len Kleis

OUR COMPLETE SHORT STORY—

SECOND MEETING

Unexplained Words Deepened
The Mystery For Val.

By ANNA E. WILSON

VAL stopped dusting out the pigeon holes long enough to glance at David Roth's lumber mill backed up against a blaze of purple and brown. She opened the window wider to let in the sun. The smell of pines from across the river made her think of young Dave Roth. She sighed painfully.

The phone rang. It was Dave's cousin, Claire. She was excited. "Dave's coming back, Val. The company's moving its headquarters. Come to dinner tonight. And please wear that green dress with the gold belt. Dave loves it."

Val replaced the receiver, her hand shaking. Tonight she'd see Dave Roth. Even when she calmed down enough to sort letters, her heart was thumping.

Her hands still full of letters, she took another glance at the lumber mill and now the sun fairly danced on the river and the maples were pure gold. She finished sorting the letters in her hand right down to the last one. She stared at it idly.

Mrs. David Roth. It couldn't have been plainer.

She put the letter carefully in an empty hole and went on working numbly. The post office was quiet. At the noon whistle, she closed the wicket and sat staring at Dave Roth's mill. Two girls entered, giggling. Seeing the closed wicket, they took it for granted that the office was deserted.

Polly Rodgers was all agog. "She came in with Dave Roth on the noon train. Blonde and just the right kind of figure." She dropped to a whisper. "They say he was crazy about Val before he went away. I wonder how Val will take it?"

Tying a scarf about her head with gold fingers, Val knew how she would take it. She'd wear her green dress with the gold belt and—but somehow she couldn't see herself smiling at Dave Roth's wife. She couldn't bear it.

It was scarcely a year ago that Dave had come to work at the mill. Dave's father had a dozen small plants across the country and this was one of them. She'd been working in the mill office helping Peter Rielle, the manager. Peter was due for a long vacation. She'd been bent over typing when he came in bringing Dave with him.

"This is Dave Roth, Val. He's taking over while I'm away." She'd look-

ed up right into Dave's eyes. She'd been conscious of a large brown hand in which her own was smothered.

They'd both loved the smell of fresh-cut wood and pine needles that drifted through the window. When she told him about Steve, he'd exploded.

"But, Val. It's true that you and Steve have been going together since you were kids but that's no reason why you should feel you have to stick to him because you're sorry for him. Accidents happen every day and Steve would be the last person to want you to be unhappy."

She'd taken him to the hospital and the minute their eyes met over Steve's wheel chair, she'd known it was all over.

Steve's love and trust shone plainly in the eyes that followed every move she made. He confided to Dave, "If it wasn't for Val, I wouldn't have the strength to fight on. Tomorrow's the tenth operation."

Dave had wired for a manager to take over and left the next day for company headquarters. She'd taken this job in the post office. She'd had only one letter from Dave—when Steve had died six months ago. She'd felt that Dave was giving her time to get over Steve's death tactfully.

Outside, Val ran into Phil Cross. Phil carried her tray in the lunchroom. He scolded her mildly. "It's time you went out more. Ever since Steve died, you've been moping." His kind face twisted into a frown. "Seems to me that if Dave Roth really loved you, he'd have done something about it. Why not forget about it all and let me take you to a show tonight?"

Phil loves me, Val thought numbly. She gathered up her purse and gloves. "I'll let you know later. I want to think things over, Phil."

She was thinking it over at mid-afternoon. The letter lay uncalled for. Staring again at the river, Val was thinking of another letter. Steve's letter. She hadn't got it until after Steve died.

"I knew," Steve had written, "it had happened to you and Dave the minute you came into the hospital. I'd have spoken then, Val, but I knew that if you married Dave thinking you'd hurt me there would have been a flaw in your happiness. I knew then that it would only be a few months at the most and Dave isn't the kind to love lightly."

Steve had loved so much. Had understood so much. Had he been right about Dave? Was that letter just a part of a nightmare? She took it out and read over the address. Mrs. David Roth. Blonde with a nice figure.

Her hands hesitated between the suit and the green dress. If she went out with Phil tonight, he'd ask her to marry him. He was kind and honest. Her hands ran smoothly over the suit. In the pocket something crackled. It was Steve's letter. Steve hadn't blamed her for loving Dave. He had tried to smooth the way of her happiness.

The green dress made her hair look leaf brown and her eyes like spring water. In the doorway of Claire's living room, her courage faltered.

Claire's voice steadied her. You're late, Val. We're all waiting." Across the room, her eyes found Dave's. He smiled broadly. "Come over here, Val, I've someone to show you."

Val was conscious of smooth shining hair and gay eyes. She's older than she seems, her mind registered. Then Dave's voice cut through the fog in her brain.

"What do you think, Val. Dad's moving his headquarters here, lock, stock and barrel. He's coming tomorrow but I brought Eleanor along to help pick out houses. Val... this is Mrs. David Roth... my stepmother."

WESTERN BRIEFS

Trout To Sparkle Again

BLAIRMORE, Alta. — Trout in Crow's Nest River will sparkle again. Forestry officials said open coal-mine sumps which poured coal dust into the river this summer have been closed. The dust turned the fish jet black.

Legal Attire

VANCOUVER. — Since Chief Justice W. E. Farris announced that judges won't recognize improperly-dressed lawyers, the legal fraternity has been brushing up on the proper legal dress. It includes a black waistcoat, "dicky" or white shirt, wing collar and tie, dark striped trousers, black shoes and black robe.

Record Prices For Hogs

EDMONTON. — Record high price was realized for purebred Yorkshire bacon-type boars at the Edmonton fall show when \$360 was paid for the champion by Ken Houghham of Frenchman's Butte, Sask.

Made Hazardous Landing

PRINCE ALBERT, Sask. — Bush pilot Donald Brownridge made a hazardous landing on the thin, early-season ice on a northern Saskatchewan lake to pick up a badly-burned child.

Collegiate Ready Next Year

KAMSACK, Sask. — It is expected that classes will start in the new Kamsack collegiate next August, according to the report given by W. Turner, chairman of the collegiate board, to the annual school ratepayers' meeting.

To Coach Dauphin Team

DAUPHIN, Man. — Roy Bentley, brother of Max and Doug Bentley of National Hockey league fame, has been signed as coach of the Dauphin Kings and assistant director of minor hockey for the 1951-52 season.

Oil Plant in Bonnyville Area

EDMONTON. — Plans for construction of an oil-processing plant in the Bonnyville area, 150 miles northeast of Edmonton, have been announced by Tor American Oils Ltd. of Montreal. Construction is to start immediately on the plant as well as on storage tanks, loading platform and racks.

Manitoba And
Sask. Milk
Production Drop

WINNIPEG. — Milk production in Manitoba dropped 67,000,000 pounds in the three-year period from January, 1948, until Dec., 1950, C. H. P. Killick, provincial dairy commissioner, reported.

The trend in 1951 continued downward with indications pointing to a further two per cent. decrease in the amount of milk produced, he said.

In 1948, milk production totalled 1,192,000,000 pounds; in 1949 it had slipped to 1,162,000,000 and in 1950 the figure stood at 1,125,000,000.

REGINA. — Milk production in Saskatchewan dropped almost 200,000,000 pounds from 1948 to 1950, government records showed.

Saskatchewan milk production in 1948 was approximately 1,802,000,000 pounds. By 1950 it had dropped to 1,612,000,000 pounds.

Dairymen attribute this decline to relatively higher returns from other types of farming, such as beef cattle or grain production. Other reasons advanced are the difficulty in obtain-

ing suitable labor, the impact of dairy product substitutes and the low price of dairy products.

The number of milch cows on Saskatchewan farms this year is the lowest in 20 years.

The ancient Etruscans used tombs hewn out of solid rock as family burial places.

FEATHER BUNS

• Combine $\frac{3}{4}$ c. water, 3 tbs. granulated sugar, 1 tsp. salt and $\frac{1}{4}$ c. shortening; heat, stirring constantly, until sugar and salt are dissolved and shortening melted; cool to lukewarm. Meanwhile, measure into a large bowl $\frac{1}{4}$ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add cooled sugar-shortening mixture and stir in 1 well-beaten egg and 1 tsp. lemon juice. Sift together

twice 2 c. once-sifted bread flour and $\frac{1}{4}$ tsp. ground mace. Stir into yeast mixture; beat until smooth. Work in 1 c. once-sifted bread flour to make a very soft dough. Grease top of dough. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and cut out rounded spoonfuls of dough with a tablespoon and drop into greased muffin pans, filling each pan about half-full. Grease tops. Cover and let rise until doubled in bulk. Bake in a hot oven, 425°, about 20 minutes. Yield — 20 medium-sized buns.

DRUMHELLER

GOVERNMENT OF THE PROVINCE OF ALBERTA

announces the third Annual

MASTER FARM FAMILY AWARDS

for 1951 to the following:

JOHN J. POROZNI

WILLINGDON, Alberta

FLOYD GILKYSON

LA GLACE, Alberta

J. W. HOSFORD

SOUTH EDMONTON, Alberta

VICTOR WATSON

AIRDRIE, Alberta

The Master Farm Family Award is recognized by an award of \$1,000.00, an engraved plaque and a name plate for the farm entrance.

The purpose of the Master Farm Family program is to find and honor those who have achieved notable progress in farming, home-making and citizenship and who, by their example, are encouraging interest in farming as a way of life. The Department of Agriculture is indeed proud and gratified with the high standard of attainment among the farm citizens of Alberta as revealed by the Master Farm Family program.

Department of Agriculture

GOVERNMENT of the PROVINCE of ALBERTA

Hon. David Ure, Minister

O. S. Longman, Deputy Minister
